

# ACTIONS FOR INDIVIDUALS

Thank you for joining the *Engineers Declare* movement. Here are some ways you can get more involved.

## Contribute to the Movement

- Inspire your personal and professional networks to join the movement.
- Like the movement @EngDeclareAu on FaceBook and Twitter.
- Join the movement group on LinkedIn.
- Share your '*Engineers Declare*' commitment via video on social media.
- Encourage your friends and colleagues to do the same.
- Tell us about positive examples of business and engineers who have made climate positive work decisions.
- Get in touch with us to take on a greater leadership or organising role.

## Take Action Through Your Role

- Put action on climate change at the centre of your decision-making.
- Work on climate positive projects. Raise your voice on climate threatening projects.
- Tackle a big opportunity or barrier to transition in your project, organisation or sector.
- Build the capacity and capability of your team to be climate positive through innovation and collaboration.

## Mobilise Your Organisation

- Speak with your organisation's leaders and your colleagues about the upcoming movement.
- Find out if your organisation has an *Engineers Declare* point of contact. If not, speak with a senior business leaders about the nomination of an appropriate person.
- Promote *Engineers Declare* through your organisation's communications channels and professional networks.

# ACTIONS FOR INDIVIDUALS

The logo consists of a black square with a red curved shape on the left side. The text "Australian Engineers Declare Climate and Biodiversity Emergency" is written in white on the red background.

Australian Engineers  
Declare Climate  
and Biodiversity  
Emergency

- Find out if your project and organisation have a transition plan. If so - review it, share it and make it happen. If not, build a team with senior champions to create one.
- Use the movement to celebrate one or more of your organisation's case studies of positive climate action, and stories of transition - how is your organisation approaching low carbon planning and transition?
- Work with your colleagues to host an event to discuss transition planning and action.
